

# MINI **MONITOR** FLASH

Hi RCARA Hams

#4 May, 2021

## GREAT MOON BOUNCE Show!

15 of you and 3 guests **ZOOM**ed in to catch Clair's (K6LG) Moon Bounce (EME) presentation at the April 8 meeting. He made it look easy! Members also voted to buy a battery to keep Alan's (KM6KPW-R) **EchoLink** supplied with power when SCE has to cut electricity service. Meeting Minutes are posted on W6TJ.org. Club members have benefited greatly this year with **EchoLink** connection to the repeater. If you have trouble hearing or being heard at the Monday night 7pm Net, check with KM6KPW (Km6kpw@scrnet.com) to see if **EchoLink** will help you.

//////////

March Field Air Museum and Moreno Valley Amateur Radio Association have created the Frank Rizzo Radio Room. Attached is a flyer by the Moreno Valley Radio Club. Sounds like this is something they are developing that may be interesting to any of you history buffs.

## **CQ, CQ, CQ, FIELD DAY 2021, CQ, CQ, CQ**

Are you getting ready for Field Day 2021? This one-day (only 1 day this year) event will be at **Martha McLean Park Anza Narrows Park, 5759 Jurupa Ave, Riverside, CA 92504 on Saturday, June 26, 2021.**

We will be maintaining Covid precautionary measures. Please bring your mask. We will set up with spacing between stations. We will have baggies to protect microphones if you will be sharing microphones. We will have sanitizer but **DO NOT WIPE SANITIZER ON ANY CLEAR PLASTIC SURFACES and WIPE YOUR FINGERTIPS CLEAN BEFORE USING ANY "TOUCH SCREEN" surfaces.** We will have voice, digital and CW participants. Current plans are to be 3A ORG for 3 stations and 4A ORG if we end up with 4 stations. Juan, AJ6PH, is working on physical layouts so we have stations and antennas within a 1000 foot diameter circle. More details and sign-up sheets will be available at our May and June Meetings on the Air so be sure to **ZOOM** with us.

Juan,AJ6PH, has developed programing for the future meetings. Our May MOTA will be 7pm Thursday, May 13, 2021, via **ZOOM** only, with pre-meeting rag chewing at 6pm. John Carroll, AA6RF (NEW call sign!) will be giving a presentation on T-Hunts: How they work, the basics and practical uses/applications. We would like you to **ZOOM** with us, even if you don't want be seen or heard. You may hear something that will be important to you. Watch for Alan's email closer to May 13.
